

Conserve Natural Resources for Future Generations

- Americans throw away enough aluminum cans to rebuild an entire commercial air fleet every three months.
- One hundred percent of a recycled aluminum can ends up as another aluminum can in as little as 60 days
- An aluminum can has no limit to the number of times it can be recycled
- Throwing away a single aluminum can is like pouring out six ounces of gasoline
- The production of one ton of aluminum ingot requires 4-5 tons of bauxite ore.

- More than 37% of the raw materials used to make paper, comes from recycled paper
- Nearly 80 percent of all U.S. papermakers use some recycled paper to make everything from newspaper to paperboard packaging to office paper.
